DRAPERY HARDWARE

Custom Rodding

CUSTOM RODDING

for the detail obsessed

If you're looking for a unique solution for your window treatment design, our custom rodding collection has you covered.

We can expertly craft a variety of solutions for almost any configuration you dream up. We have a gorgeous decorative collection and a more technically refined collection, our unique Architrac® Series.

Within each collection, you'll find functionality, practicality and durability all built to suit your exact specifications.

Designed by you, assembled with care by our expert hands, our custom rods are the answer to your drapery hardware problems.

Hollis™ & Estate™ Traverse Rods: Two Styles. Infinite Ways of Customization.

Not every window treatment is a simple, straight forward project. Sometimes you need more and that's where our traverse rods shine. They are the perfect solution when you need something a little extra, like a pleated or Ripplefold™ custom drapery, a custom pole length, or the oh-so-convenient option of motorization.

There are many ways to customize each traverse rod, we are certain you'll find the perfect solution for your window treatments. It's nice having options, isn't it?

Which traverse rod is right for you?

HOLLIS™ TRAVERSE ROD

Hollis™ Traverse Rod is the perfect solution for creating a uniform look between traverse rods and stationary rods in the same space or throughout the home. Great for tight spaces with its 1" compact size and coordinating finials. You can even go without a finial and still have a completed look in one of our stunning Designer Metals™ finishes.

ESTATE™ TRAVERSE ROD

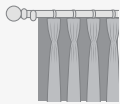

Estate™ Traverse Rod is a stately solution better suited for larger projects with a 1½" or 2" option. You also have a choice of metal, wood and even wrought iron for a material choice. Not to mention, many finishes and finials to choose from to complete your look.

Splices & Keystones per Track

Track Length	Number of Splices	Keystones Included for Estate™ Traverse Rods Only
8 ft. to 16 ft.	1	1

Traverse Rod Operating Systems

Motorized Draw

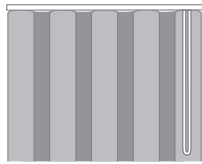

AMP™ Motorization

- Easy to use
- Quiet, powerful motor
- Pleated or Ripplefold™
- For Hollis™ Traverse Rods, Estate™ Traverse Rods or Architrac® Series 94001
- For more information, see page 84

Manual Draw

Cord Draw

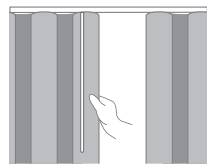

- Easy to use
- Pleated or Ripplefold™
- For Estate™ Traverse Rods only

Hand/Baton Draw

- Easy to use
- A gentle tug allows drapery to glide across track
- Pleated or Ripplefold™

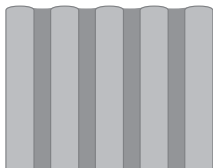

Baton Duplex Draw

- Easy to use
- Used on split draw rods
- Pleated or Ripplefold™
- When the baton is pulled on one stack, draperies on both sides of the traverse rod open or close
- For Estate™ Traverse Rods only

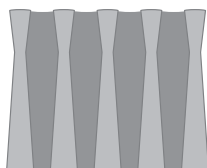

Header Styles

Ripplefold™

- Panels can be pressed flat, yet fall into fold
- No hooks or pins
- Headings are suspended under track
- Stack back is less than conventional pleated draperies
- Draperies snap on/off carriers for easy installation
- Interior drapery appearance is identical to exterior-facing appearance

Pleated

- A classic header option
- Can be used with most track systems using slip-in or pin-on hooks
- Headings can be suspended under the track or over the face of the track to conceal hardware
- Four carriers per foot is standard, additional carriers or rings can be ordered

Architrac® Series Operating Systems

Motorized Draw

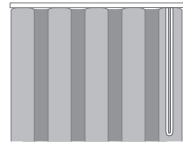

AMP™ Motorization

- Easy to use
- Quiet, powerful motor
- Pleated or Ripplefold™
- For Estate™ Traverse Rods or Architrac® Series 94001
- For more information, see page 84

Manual Draw

Cord Draw

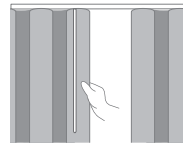

- Easy to use
- Pleated or Ripplefold™

Hand/Baton Draw

- Easy to use
- A gentle tug allows drapery to glide across track
- Pleated or Ripplefold™

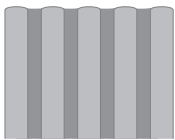

Baton Duplex Draw

- Easy to use
- Used on split draw rods
- Pleated or Ripplefold™
- When the baton is pulled on one stack, draperies on both sides of the traverse rod open or close

Header Styles

Ripplefold

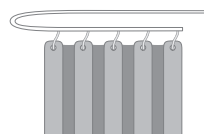

- Panels can be pressed flat, yet fall into fold
- No hooks or pins
- Headings are suspended under track
- Stack back is less than conventional pleated draperies
- Draperies snap on/off carriers for easy installation
- Interior drapery appearance is identical to exterior-facing appearance

Pleated

- A classic header option
- Can be used with most track systems using slip-in or pin-on hooks
- Headings can be suspended under the track or over the face of the track to conceal hardware
- Four carriers per foot is standard, additional carriers or rings can be ordered

Cubicle

- An excellent choice where privacy is necessary; often found in healthcare facilities, this heading style can be used more creatively as a soft treatment room divider or a shower curtain rod
- Smooth, snag free operation
- Extra durable extruded aluminum constructions
- Inner surface is center grooved for easy installation

Series 94001 | Recessed

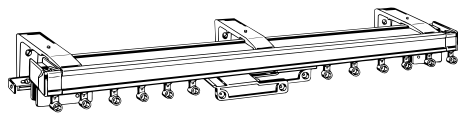

Architrac® Series 94001

Series 94001 Overview

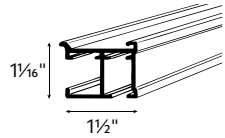

Overview

- AMP™ Motorization available
- Assembled sets includes all necessary components
- Most versatile Architrac® Rod
- Heavy duty, ball bearing pulleys
- Heavy duty, wheeled (Ripplefold™) or ball bearing (pleated) carriers
- Can be curved or bent (not available for motorized tracks)
- Wall or ceiling mount available
- Manual or Motorized Drawn Rods

AMPTM Motorization Upcharge

Charger, item #62201300 included. Remotes sold separately.

Bending & Crating Fees

*Bend Fee:

\$75 per bend.

*Curve Fee:

\$17 per foot fee. To calculate total cost of curve fee multiply \$17 times the total track length in feet. The minimum curving fee per track is \$113.

*Crating fee:

Crating fee is not included in the bending fee or minimum curving fee. A \$50 fee **per line** will be applied as a surcharge to orders.

To calculate the total crating fee multiply the number of order lines you are ordering by \$50.

Example 1:

Order line 1 has qty of 5 rods that are all the same length and same bend/curve 1 order line x \$50 crating fee per rod = \$50.00 in total crating fees

Example 2:

Order line 1 has qty of 1 rod with a bow bend
Order line 2 has qty of 2 rods with a curve
Order line 3 has qty of 2 rods with a bay bend
3 order lines x \$50 crating fee per rod = \$150.00 in total crating fees.

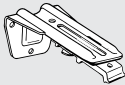

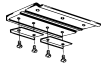

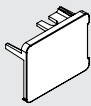

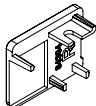

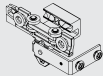

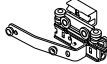

**Crating Fee Exception:

If there is an order that has a large quantity of rods the same length and same bend/ curve and all rods cannot fit into one crate, an additional crate fee of \$50 will be applied.

Track Only									
Track Size	1.5' to 2'	4'	6'	8'	10'	12'	14'	16'	

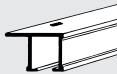

20' tracks available in white only.

Bending & Crating Fees

- *Bend Fee:**
\$75 per bend.
- *Curve Fee:**
\$17 per foot fee. To calculate total cost of curve fee multiply \$17 times the total track length in feet. The minimum curving fee per track is \$113.
- *Crating fee:**
Crating fee is not included in the bending fee or minimum curving fee. A \$50 fee per line will be applied as a surcharge to orders. To calculate the total crating fee multiply the number of order lines you are ordering by \$50.

Example 1: Order line 1 has qty of 5 rods that are all the same length and same bend/curve 1 order line x \$50 crating fee per rod = \$50.00 in total crating fees	Example 2: Order line 1 has qty of 1 rod with a bow bend Order line 2 has qty of 2 rods with a curve Order line 3 has qty of 2 rods with a bay bend 3 order lines x \$50 crating fee per rod = \$150.00 in total crating fees.
--	---

****Crating Fee Exception:**
If there is an order that has a large quantity of rods the same length and same bend/ curve and all rods cannot fit into one crate, an additional crate fee of \$50 will be applied.

	1017C061	Zinc	1½" Heavy Duty Jet Pin Hooks	5,000 pieces per box
	7618B063	Brass	Decorative Tieback Hook	10 pairs per box
	7620B063	Brass	Hook & Ring Tiebacks 4 per bag	20 bags per box

AMP™ Motorization

Why AMP™?

The slim design of the quiet, yet powerful motor and the position on the track allows the motor to tuck seamlessly behind your drapery panel so you'll never have to sacrifice your style or comfort. For safety measures, you're able to move the draperies with a gentle tug, allowing for operation when a remote is not present or if a guest is unaware of the motorization feature. The dual battery and AC power sources allows operation in case of a power outage so draperies may be opened in the event of an emergency. AMP™ Motorization is available on our most popular traversing tracks, Hollis™ Traverse Rods Estate™ Traverse Rods and Architrac® Series 94001 and in drapery header styles Ripplefold™ and pleated for a variety of styling options. This is comfortable living at its finest.

For AMP™ Motorization brochure, programming instructions and installation instructions, please visit the drapery hardware resource library at kirsch.com.

Benefits & Features

AMP™ Motorization

- Motor mounts to the back of the track which allows a seamless look between motorized and manual traverse rods
- Drapery fabrication does not need to change between manually controlled draperies and motorized draperies; No additional returns or any special instructions
- Limits are set automatically after installation
- Remote control is radio frequency and easily pairs with the motor
- Tug feature; when drapery is pulled the motor will traverse the drapery
- AMP™ App with AMP™ USB Bridge
- Architrac® Series 94001 Rods with AMP™ cannot be bent or curved

Frequently Asked Questions

What is the weight capacity?

64 lbs Motor is rated to 64 lbs. Be sure not to exceed the Estate or Architrac track specifications to ensure your motor operates optimally.

Can you double the weight capacity by using two motors?

No Only use one motor per rod.

Does AMP™ offer limit setting?

Yes The motor automatically sets its limits.

Does AMP™ offer touch control?

Yes The tug feature allows you to pull on the drapery and the motor will automatically open or close your draperies.

How long is the power cord?

6 ft The durable, non-extendable power cord is extra long for out of reach places. Any extra can be rolled and secured for a tidy look. Cable extensions are available in 15", 4', 10' and 20' lengths to reach outlets that are farther away from the motor.

Is there a wall switch?

Yes There are Flush Mount and Surface Mount Wall Switches available.

Does AMP™ offer a warranty?

Yes See the Kirsch Warranty document for more information.

Motor Unit

Product No.

AMP™ Drapery Motor 62001300

Technical Specs

AMP™ Motor

Power Supply DC 16.5V-0.89A
(100-240VAC 50/60Hz 0.5A)

Amperage 2.55Ah

Average Linear Speed 7.8inches/sec

Power Consumption 40 watts

Torque 1.2Nm

Power Cable Length 6 feet

Variable Speed 80, 100 & 120 rpm

Certifications UL/CE

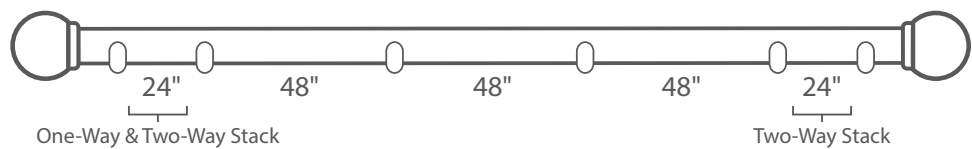

Max. Track Length Hollis™ - 16 ft
Estate™ - 16 ft
Architrac™ 94001 - 16 ft

Max. Load 64 lbs

Follow track specifications for drapery weight.

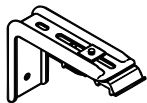

Estate™ Traverse Rods Bracket Spacing & Mount Options

Place brackets at each end. On the ends where the drapery will stack, place the next bracket at a maximum of 24" from the first bracket, then place remaining brackets at 48" intervals over the remainder of the track. Spacing may need to be shortened for heavier draperies. All mounting options are compatible with our AMP™ Motorization.

Wall Mount using parts:

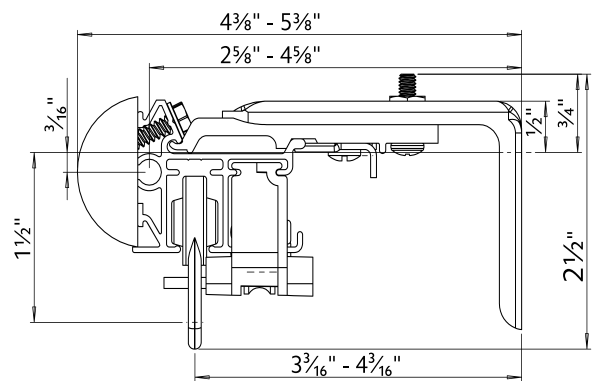

To achieve this look, order Estate™ Traverse Rod, wall mount and all components will be included.

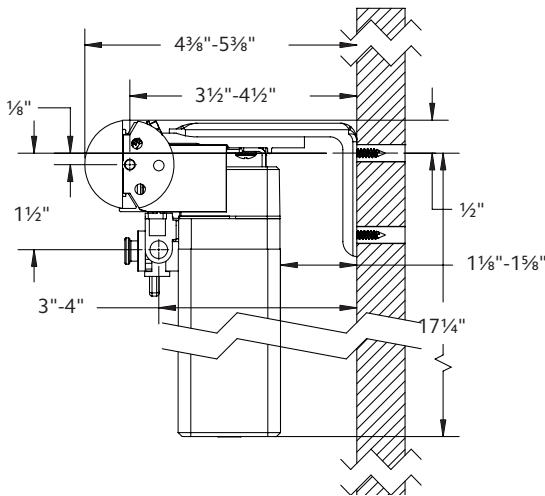

- 94129061 Zinc
- 1856973 Satin Nickel
- 1856978 Brushed Bronze
- 1857324 Black

Selected color:

Calculating Drapery Weight

1. Fabric Weight

Some fabric samples list on the back of the swatch the weight listed in Ounces/SqYd (ounces per square yard). Call the manufacturer for the weight if not listed.

2. Lining Weight

Most drapery linings are 2oz - 4oz per square yard.

Drapery Weight Formula

Total Square Yards = (total yards x 36 x fabric width) ÷ 1296 (1-square yard)
Weight = total square yards x weight in ounces per SqYd) ÷ 16 oz in lb

Example 32 yards of 54" wide fabric weighing 14 oz/SqYd
Total square yards = (32 x 36 x 54) = 62,208 ÷ 1296 = 48 SqYds
Weight = (48 x 14oz) = 672 ÷ 16 = 42 lbs

Lining Weight Formula

Total Square Yards = (total yards x 36 x fabric width) ÷ 1296 (1-square yard)
Weight = total square yards x weight in ounces per SqYd) ÷ 16 oz in lb

Example 32 yards of 54" wide fabric weighing 6 oz/SqYd
Total square yards = (32 x 36 x 54) = 62,208 ÷ 1296 = 48 SqYds
Weight = (48 x 4oz) = 192 ÷ 16 = 12 lbs

Fabrics by Weight

Contact the fabric manufacturer for your specific fabric weight.

Fabric Type	Weight per Square Yard
Drapery Lining	2-4oz
Interlining	5-6oz
Blackout Lining	6-10oz
Bump Lining	12-14oz
Silks	2-4oz
Chintz	2-4oz
Printed Cottons	4-6oz
Linens	6-10oz
Jacquards	10-14oz
Velvets	14-18oz

Top Hole Installation Guide for Decorative Traverse Rods

This chart will position the bracket so the drapery will clear the floor approximately ½".

1. Find your pole style, size and header style in the chart.
2. Determine the desired finished drapery length.
3. Add or subtract number in the top hole column from the drapery's finished length to determine how high to measure for the top hole of the bracket.

	Pleated (any variety) Top Hole Adjustment				Ripplefold™ (any fullness) Top Hole Adjustment
	Showing Rod	Pin Setting	Covering Rod	Pin Setting	Showing Rod (Ripplefold treatments always show rod)
