DRAPERY HARDWARE

Custom Rodding

MADE JUST FOR YOU

---

## CUSTOM RODDING: FOR THE DETAIL OBSESSED

**Built to suit** your exact specifications.

**Design solutions** solved with  
multiple configuration options.

**Assembled with care** by expert hands  
for absolute perfection.

---

We take great care to review each unique order we receive before we construct individual rods by hand. From decorative to basic, functional to practical, we have a large range of configurations that will suit any of your projects. Our custom rods are the answer to all of your drapery hardware problems.

# AMP™ Motorization

## Why AMP™?

The slim design of the quiet, yet powerful motor and the position on the track allows the motor to tuck seamlessly behind your drapery panel so you'll never have to sacrifice your style or comfort. For safety measures, you're able to move the draperies with a gentle tug, allowing for operation when a remote is not present or if a guest is unaware of the motorization feature. The dual battery and AC power sources allows operation in case of a power outage so draperies may be opened in the event of an emergency. AMP™ Motorization is available on our most popular traversing tracks, Estate and Architrac® Series 94001 and in drapery header styles Ripplefold™ and pleated for a variety of styling options. This is comfortable living at its finest.

For AMP™ Motorization brochure, programming instructions and installation instructions, please visit the drapery hardware resource library at [kirsch.com](http://kirsch.com).

## Benefits & Features

### AMP™ Motorization

- Motor mounts to the back of the track which allows a seamless look between motorized and manual traverse rods
- Drapery fabrication does not need to change between manually controlled draperies and motorized draperies; No additional returns or any special instructions
- Limits are set automatically after installation
- Remote control is radio frequency and easily pairs with the motor
- Tug feature; when drapery is pulled the motor will traverse the drapery
- AMP™ App with AMP™ USB Bridge
- Architrac® Series 94001 Rods with AMP™ cannot be bent or curved

## Frequently Asked Questions

### What is the weight capacity?

**64 lbs** Motor is rated to 64 lbs. Be sure not to exceed the Estate or Architrac track specifications to ensure your motor operates optimally.

### Can you double the weight capacity by using two motors?

**No** Only use one motor per rod.

### Does AMP™ offer limit setting?

**Yes** The motor automatically sets its limits.

### Does AMP™ offer touch control?

**Yes** The tug feature allows you to pull on the drapery and the motor will automatically open or close your draperies.

### How long is the power cord?

**6 ft** The durable, non-extendable power cord is extra long for out of reach places. Any extra can be rolled and secured for a tidy look. Cable extensions are available in 15", 4', 10' and 20' lengths to reach outlets that are farther away from the motor.

### Is there a wall switch?

**Yes** There are Flush Mount and Surface Mount Wall Switches available.

### Does AMP™ offer a warranty?

**Yes** See the Kirsch Warranty document for more information.

Download the AMP™ APP to get started

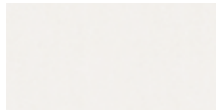

# AMP™ Motorization Overview

## Overview

- Soft start/stop & manual operation

## AMP™ Motor

Power Supply DC 16.5V-0.89A  
(100-240VAC 50/60Hz 0.5A)

Amperage 2.55Ah

Average Linear Speed 7.8inches/sec

Power Consumption 40 watts

Torque 1.2Nm

Power Cable Length 6 feet

Variable Speed 80, 100 & 120 rpm

Certifications UL/CE

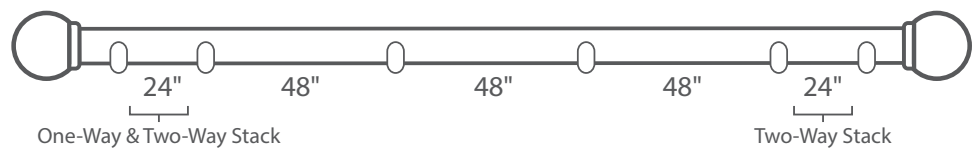

Max. Track Length Estate™ - 16 ft  
Architrac™ 94001 - 16 ft

Max. Load 64 lbs

Follow track specifications for drapery weight.

# Bracket Spacing & Mount Options

Place brackets at each end. On the ends where the drapery will stack, place the next bracket at a maximum of 24" from the first bracket, then place remaining brackets at 48" intervals over the remainder of the track. Spacing may need to be shortened for heavier draperies. All mounting options are compatible with our AMP™ Motorization.

# Why Estate™ Traverse Rods

The Estate™ Traverse Rod Collections are the flagship of the Kirsch® Decorative Drapery Hardware product lines. Estate™ rods are decorative, 1⅜ inch or 2 inch traversing drapery rods with wheeled carriers that are designed to carry today's heavier draperies. Having set the interior design standard for decades, each of the Estate™ collections are characterized by inspired finials, premium finishes and precision engineered components.

Designer Metals™, Wood Trends™, and Wrought Iron Collections are featured in countless luxury venues and designer homes throughout the world.

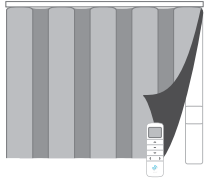

# Operating Systems

---

## Motorized Draw

### AMP™ Motorization

---

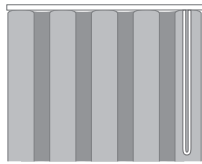

- Easy to use
- Quiet, powerful motor
- Pleated or Ripplefold™
- For Estate™ Traverse Rods or Architrac® Series 94001
- For more information, see page 8

## Manual Draw

### Cord Draw

---

- Easy to use
- Pleated or Ripplefold™

### Hand/Baton Draw

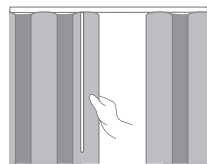

---

- Easy to use
- A gentle tug allows drapery to glide across track
- Pleated or Ripplefold™

### Baton Duplex Draw

---

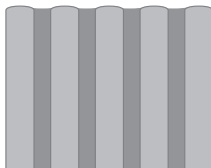

- Easy to use
- Used on split draw rods
- Pleated or Ripplefold™
- When the baton is pulled on one stack, draperies on both sides of the traverse rod open or close

# Header Styles

---

### Ripplefold™

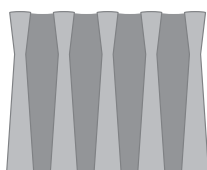

---

- Panels can be pressed flat, yet fall into fold
- No hooks or pins
- Headings are suspended under track
- Stack back is less than conventional pleated draperies
- Draperies snap on/off carriers for easy installation
- Interior drapery appearance is identical to exterior-facing appearance

### Pleated

---

- A classic header option
- Can be used with most track systems using slip-in or pin-on hooks
- Headings can be suspended under the track or over the face of the track to conceal hardware
- Four carriers per foot is standard, additional carriers or rings can be ordered

# Estate™ Overview

To help determine which system is right for your project, use the guideline below to select the best fit. For more detailed information about each track, please visit our resource library at [kirsch.com](https://kirsch.com).

# Calculating Drapery Weight

## 1. Fabric Weight

Some fabric samples list on the back of the swatch the weight listed in Ounces/SqYd (ounces per square yard). Call the manufacturer for the weight if not listed.

## 2. Lining Weight

Most drapery linings are 2oz - 4oz per square yard.

### Drapery Weight Formula

**Total Square Yards** = (total yards x 36 x fabric width) ÷ 1296 (1-square yard)  
**Weight** = total square yards x weight in ounces per SqYd) ÷ 16 oz in lb

**Example** 32 yards of 54" wide fabric weighing 14 oz/SqYd  
Total square yards = (32 x 36 x 54) = 62,208 ÷ 1296 = 48 SqYds  
Weight = (48 x 14oz) = 672 ÷ 16 = 42 lbs

### Lining Weight Formula

**Total Square Yards** = (total yards x 36 x fabric width) ÷ 1296 (1-square yard)  
**Weight** = total square yards x weight in ounces per SqYd) ÷ 16 oz in lb

**Example** 32 yards of 54" wide fabric weighing 6 oz/SqYd  
Total square yards = (32 x 36 x 54) = 62,208 ÷ 1296 = 48 SqYds  
Weight = (48 x 4oz) = 192 ÷ 16 = 12 lbs

### Fabrics by Weight

Contact the fabric manufacturer for your specific fabric weight.

| Fabric Type     | Weight per Square Yard |
|-----------------|------------------------|
| Drapery Lining  | 2-4oz                  |
| Interlining     | 5-6oz                  |
| Blackout Lining | 6-10oz                 |
| Bump Lining     | 12-14oz                |
| Silks           | 2-4oz                  |
| Chintz          | 2-4oz                  |
| Printed Cottons | 4-6oz                  |
| Linens          | 6-10oz                 |

# Why Architrac®

The Architrac® heading system supports the three most popular drapery heading styles, Ripplefold™, pleated and cubicle. Outstanding functionality for commercial applications, versatile enough for residential applications, Architrac® delivers performance for the most demanding applications. All assembled sets come complete and ready-to-install, and are available in manually traversing systems, or Series 94001 can be upgraded with AMP™ Motorization.

A perfect complement to the Architrac® series, our new K-Rail allows you to use any of our 1 $\frac{3}{8}$ " finials from any of our collections, no matter the material or finish. You now have the ultimate power to customize your design since our K-Rail is designed in finishes that complement all of our collection finishes perfectly. You can finally bring your project to another level of customization.

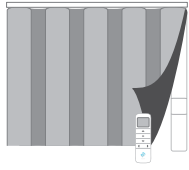

# Operating Systems

---

## Motorized Draw

### AMP™ Motorization

---

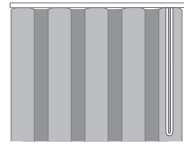

- Easy to use
- Quiet, powerful motor
- Pleated or Ripplefold™
- For Estate™ Traverse Rods or Architrac® Series 94001
- For more information, see page 8

## Manual Draw

### Cord Draw

---

- Easy to use
- Pleated or Ripplefold™

### Hand/Baton Draw

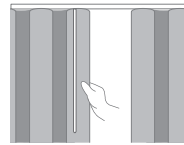

---

- Easy to use
- A gentle tug allows drapery to glide across track
- Pleated or Ripplefold™

### Baton Duplex Draw

---

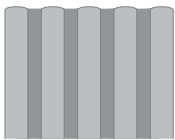

- Easy to use
- Used on split draw rods
- Pleated or Ripplefold™
- When the baton is pulled on one stack, draperies on both sides of the traverse rod open or close

# Header Styles

---

### Ripplefold

---

- Panels can be pressed flat, yet fall into fold
- No hooks or pins
- Headings are suspended under track
- Stack back is less than conventional pleated draperies
- Draperies snap on/off carriers for easy installation
- Interior drapery appearance is identical to exterior-facing appearance

### Pleated

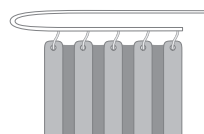

---

- A classic header option
- Can be used with most track systems using slip-in or pin-on hooks
- Headings can be suspended under the track or over the face of the track to conceal hardware
- Four carriers per foot is standard, additional carriers or rings can be ordered

### Cubicle

---

- An excellent choice where privacy is necessary; often found in healthcare facilities, this heading style can be used more creatively as a soft treatment room divider or a shower curtain rod
- Smooth, snag free operation
- Extra durable extruded aluminum constructions
- Inner surface is center grooved for easy installation

# Architrac® at a Glance

To help determine which system is right for your project, use the guideline below to select the best fit. For more detailed information about each track, please visit our resource library at [kirsch.com](http://kirsch.com).

| ONE-WAY DRAW MAXIMUM |            |    |    |    |     |     |     |     |     |     |     |     |     |     |

### Track Only

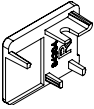

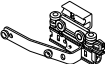

| Track Size | 1.5' to 2' | 4' | 6' | 8' | 10' | 12' | 14' | 16' | 20' |
|------------|------------|----|----|----|-----|-----|-----|-----|-----|
|------------|------------|----|----|----|-----|-----|-----|-----|-----|

- \* **Bend Fee:** \$75 per bend.
- \* **Curve Fee:** \$17 per foot fee. To calculate total cost of curve fee multiply \$17 times the total track length in feet.  
The minimum curving fee per track is \$109.
- \* **Crating fee:** \$50 is also applied which is not included in the bending fee or the minimum curving fee.  
Crate fee (per line item, identical rods). If quantity requires multiple crates, \$50 will be charged per crate.

- \* **Bend Fee:** \$75 per bend.
- \* **Curve Fee:** \$17 per foot fee. To calculate total cost of curve fee multiply \$17 times the total track length in feet.  
The minimum curving fee per track is \$109.
- \* **Crating fee:** \$50 is also applied which is not included in the bending fee or the minimum curving fee.  
Crate fee (per line item, identical rods). If quantity requires multiple crates, \$50 will be charged per crate.

# Top Hole Installation Guide for Estate™ Traverse Rods

## Top Hole Installation Guide

This chart will position the bracket so the drapery will clear the floor approximately ½".

- 1. Find your pole style, size and header style in the chart.
- 2. Determine the desired finished drapery length.
- 3. Add or subtract number in the top hole column from the drapery's finished length to determine how high to measure for the top hole of the bracket.
